Public libraries and e-content in Greece:problems and prospects

Aspasia Tasiopoulou

Ioannis Trohopoulos

EU Targets

- All schools linked to the internet by 2002
- All teachers competent in information society skills
- All workers have the opportunity to achieve the key new skill of information
- Flexible frameworks for teleworking and to meet the needs of business/employees
- Equipment to improve the employability of people with disabilities
- Citizen friendly internet sites with information on civil rights and public services
- Establishing public internet access points, plus on-site information society literacy training in all communities e.g. libraries, post offices etc.

Accelerate project 'e-content:design
for all'', Thessaloniki 22 June 2001

Future Trends

- More competitive information environment
- Evolution from print-electronic to electronic-print collections
- Focus on user needs than to collections
- Network based infrastructure
- On-going staff training
- Building redesign
- New funding models

New roles for Public Libraries

- Introduce new information technologies to the community
- Demonstrate applications and uses of networking for education, life long learning, economic development, tele-medicine and a range of other applications
- Be a local access point for a range of government information resources and services
- Create, maintain and organize electronic community information
- Equalize access such all members of local community can realize the benefits from "being connected" to the global networked environment
- Provide training to community residents on how to use the Internet and interact successfully with a range of services provided via the net
- Expand the range and types of resources and services provided from public library web sites

Pulman : Social Guidelines
http://www.pulmanweb.org

1. Digital literacy
2. Social inclusion
3. Lifelong learning
4. Support for formal education, at all levels, including distance learning
5. Support for business and the economy
6. Citizen participation in new forms of civic governance
7. Access to diverse cultural content
8. Access to music and non-print material
9. The public interest in access to copyright protected materials and related licensing initiatives; business models for right transactions

Pulman : Technical Guidelines

1. Resource description, discovery and retrieval
2. Digitization
3. Multimedia digital service delivery
4. Applications of newly developing technologies: mobile, cable/digital TV, Web TV
5. Technical responses to multi-lingual issues
6. Handling of legal issues (e.g. privacy, data protection, IRP)

PSInet : Objectives

- Provide a clear and extensive definition of what is meant by the term Public Sector Information (PSI), building on those offered by the Green Paper

- Classify and describe PSI, establishing a useful and usable typology of public sector information, incorporating factors such as:

  Policy, legislation and approach
  Subject domain
  Metadata and identifies used
  Method of data collection

- Identify countries and important domains where PSI is not available or easily accessible

- Clarify issues that define best practice and identify examples of good practice in collection, access and exploitation of PSI.

- Provide an assessment of gaps, developments required, barriers and problems and make recommendations for further RTD activity.

STATISTICAL DATA

Veria Central Public Library

- **Members : 15.000**
- **Collection : 80.000**
- **Loans : 240.000 every year**
- **22 computers – 8 for the public**
- **300 hits to our website per week**

1.   The content of the services which derived from a well planned feasibility study
   – **Direct access tools and services for users**
   – **User training sessions**
