

***"A fresh approach to journal
collection analysis"***

Ian Pattenden - Bowker (UK) Ltd

xiii
panhellenic
conference of
academic
libraries

corfu ionian university 13-15.10.04

The seal of the Hellenic Republic is circular, featuring a central figure (the Nike of Samothrace) surrounded by a wreath. The text "ΕΛΛΗΝΙΚΗ ΔΗΜΟΚΡΑΤΙΑ" is written around the top inner edge, and "ΠΑΝΕΠΙΣΤΗΜΙΟ 1984" is written around the bottom inner edge.

Context

- Libraries need to evaluate their collection of journals to ensure they meet academic requirements and to justify expenditure. This is a big challenge...
- Comparisons with defined “core collections”
- Analysis against the collections of peer institutions
- Largely manual and time-consuming process

Introduction to USAS

- Authoritative and independent database of information on 260,000+ journals published worldwide (www.ulrichsweb.com)

- New analysis module (USAS) created to allow a library to compare its own collection of journals, using the Ulrich's database as a reference point (www.ulrichsweb.com/analysis)

What is USAS?

- A reporting system designed specifically for librarians to allow you to see/understand your collection and put it in perspective
- A product designed to save time and effort with collection development decision-making
- An essential resource for anyone aiming to achieve an optimum collection within budget

What USAS offers...

It allows a library to:

- Fully analyse collection by subject area
- View collection against the entire Ulrich's database
- View collection against Ulrich's core collection
- View quality of collection for better decision-making
- Generate instant reports

Analysis criteria

Compare collection against the Ulrich's database:

- "Universe" of 219,000 active titles
- "Core" collection of 53,000 active titles, inc:
 - 26,000 refereed titles
 - 21,000 electronic titles
 - 8,500 titles reviewed in Katz Magazines for Libraries
 - 7,000+ titles with an ISI Impact Factor

What else?...

- Compare your collection with:
 - Ulrich's
 - A peer institution
 - Another library's collection
 - A consortium collection
 - An aggregated database of e-journals
 - Print v Electronic
- ***NEW: Compare any two lists you upload
i.e. database v database***

Benefits

Using the system allows a library to:

- Identify its strengths and weaknesses
- Plan and carry out an effective collection development policy, based on a clear understanding of the current situation
- Justify the purchase of new titles/packages
- Justify the renewal or non-renewal of titles/packages
- Ensure best quality and best value for money

How it works...

- Library loads a list (or lists) of their own ISSNs into USAS
- The system then compares these ISSNs with the Ulrich's data and pulls that data into the report screens
- Uploaded collection is automatically broken down into subject areas (900 Ulrich's subjects) to allow meaningful analysis
- Ability to work with data before creating a wide variety of reports

EXCITING NEW FEATURE
Open Access Journals

OPEN ACCESS IN ULRICH'S! In response to the evolving opportunities in serials information, ulrichsweb.com is now showcasing Open Access (OA) journals -- free electronic full-text academic and scholarly journals from SPARC, PLoS, Biomed Central, the Directory of Open Access Journals, and other providers. Ulrichsweb.com subscribers can now search for and directly access the home pages and full-text of hundreds of these exciting new research resources. An "Open Access" search limiter on the Advanced Search screen lets users pinpoint Open Access titles. In addition, a new "Free" price limit lets users identify all of the free publications in Ulrich's -- whether print or electronic -- including journals, magazines, newspapers, newsletters and other serials.

Summary

- Ulrich's Serials Analysis System (USAS) allows you to fully evaluate journal collections
- Subscription price dependent on number of ISSNs in the library's collection
- USAS subscription includes unlimited user access to the Ulrichsweb.com database
- Makes it easier for institutions to take current and future collection development decisions

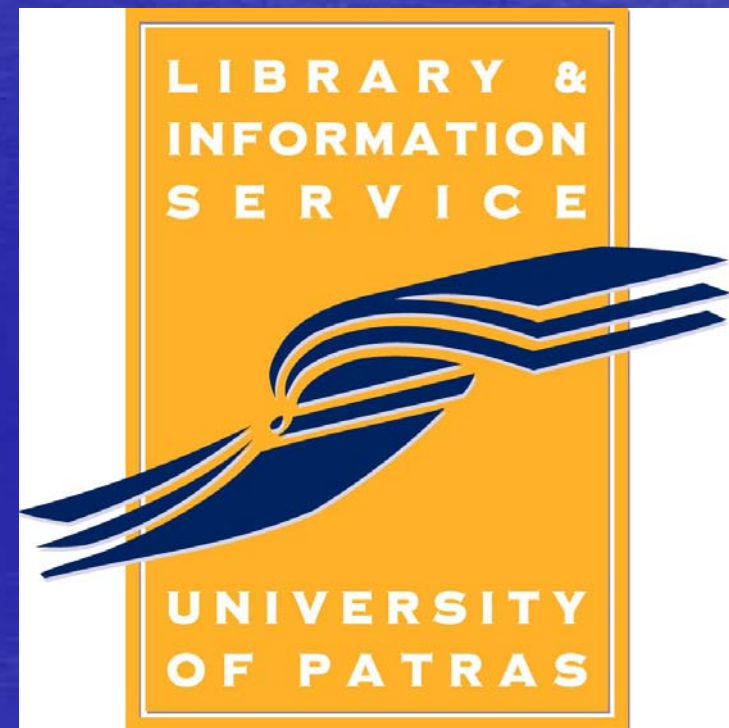

Results of analysis

- Library discovered that their collection consisted of **4.32%** of journals with an ISI Impact Factor
- Their collection plus that of Heal-Link yielded a **35.99%** coverage rate for such high-quality journals
- Overall they were able to identify that they had a **40%** coverage in their main areas of specialization...
"This makes us feel comfortable with the selection of our journal collection and it's also a good way to find out our weaknesses and eliminate them if possible"

With thanks...

- Presentation compiled using screens from the Ulrich's Serials Analysis System implementation at Library & Information Service of University of Patras
- Thanks go to Fieroula Papadatou for her help and cooperation
- 1 of 7 Greek academic libraries already using the system
