Open Access Journals – dissemination and integration in modern library services

15th Panhellenic Academic Libraries Conference,

Patras, November 2006

Lars Björnshauge,

Director of Libraries

Lund University

Introductory statements

- Libraries and Librarians have played a very important role in promoting and lobbying for Open Access to scholarly literature.

- Libraries and Librarians play a very important role in and advocacy for self-archiving and development of Institutional Repositories.

- We can be very proud of that!!

- We still have a lot to do when it comes to promoting access to the **Open Access content** in OA journals and Institutional repositories!

Agenda

- Part I:

  – Brief introduction to the Directory of Open Access Journals (DOAJ)

  – Dissemination of Open Access Journals

- Part II:

  – Integration of Open Access Journals in library services

Part I
Directory of Open Access Journals

Purpose of the DOAJ:

- making it easier for
  - readers to find OA-material
  - authors to find a journal to publish in OA
  - OA-publishers to get their journals visible
  - aggregators & libraries to integrate OA-journals data in their services

DIRECTORY OF OPEN ACCESS JOURNALS

What we hope to see ...

Increased visibility and access to Open Access journals

= Increased usage

= Increased citation

= Increased impact

= Increased usage...

etc etc

DOAJ DIRECTORY OF OPEN ACCESS JOURNALS

What is DOAJ:

- A collection of peer reviewed open access journals

- SCOPE: All disciplines – all languages

- One interface

- Provides search service for end-users

- Provides metadata harvesting services based on the OAI-PMH protocol for libraries and other service providers

Selection criteria

- ## Open Access

  - no embargo!

- ## Quality control measures,

  - the journal must exercise peer-review or editorial quality control in order to be included in the DOAJ.

- ## Scientific or scholarly content

  - The researcher as primary target group

Open Access – our definition:

Open access journals = journals that use a funding model that does not charge readers or their institutions for access.

The BOAI definition of "open access" = the right of "users to read, download, copy, distribute, print, search, or link to the full texts of these articles" as mandatory criteria

- **History:**
  - Initiated during the first Nordic Conference on Scholarly Communication in Lund/Copenhagen October 2002
  - Initially funded by Open Society Institute and co-funded by SPARC
  - Project started January 2003
  - Service launched 12th of May 2003 with 300+ journals

## Number of journals listed in the DOAJ

- May 2003:   300
- November 2003:   558
- May 2004:   1097
- November 2004:   1345
- May 2005:   1601
- November 2005:   1905
- May 2006:   2230
- November 2006:   2450

The Editorial process (simplified)

DOAJ

Editorial work:
check against criteria,
communication with
journal owner etc.,
check for compliance,
remove uncompliant
journals etc

DOAJ - Directory of Open Access Journals, 2006, Lund University Libraries, Head Office

Searching of Main Cause Leading to Severe Influenza
A Virus Mutations and Consequently to Influenza Pandemics/Epidemics

Guang Wu and Shaomin Yan
Computational Mutation Project, DreamSciTech Consulting, 301, Building 12, Nanyou A-zone
Jiannan Road, Shenzhen, Guangdong Province, CN-518054, China

Abstract: The unpredictable mutations in the proteins from influenza A virus lead to the great difficulty in prevention of possible outbreak of bird flu and pandemic/epidemic of influenza. This unpredictability is due to the fact that we know little about the causes that lead to the mutations. In three of our recent studies on the hemagglutinins from influenza A virus, we unintentionally noticed the periodicity of mutations in hemagglutinins similar to the periodicity of sunspot. We calculated the amino-acid pair predictability and amino-acid distribution rank, which are developed by us over last several years and can numerically present the evolution of proteins in question, of 1217 full-length hemagglutinins from influenza A viruses. We then used the fast Fourier transform to determine the periodicity of mutations in the hemagglutinins. We compare the periodicities of mutations in influenza A virus hemagglutinins with those of solar and galactic cosmic rays and find a main periodicity of the mutations identical to that of sunspot and neutron rate (11 years/circle). Then we plot the sunspot number with respect to the historical pandemics/epidemics/non-pandemic new strains over last three centuries and compare the recorded sunspots with the historical pandemics before 1700. Both show a good agreement between sunspot activity and influenza related events. As the histories of Sun and

Redirected requests per month
Using DOAJ for harvesting Metadata

You also have the possibility to use the Boolean operators and, or, not.

How can I get journal metadata from DOAJ?

The DOAJ service supports the OAI protocol for metadata harvesting (OAI-PMH). Thus, any other service can obtain records from DOAJ for inclusion in their collection. OAI is well established, and easy to use. The base URL is: http://www.doaj.org/oai . You can add most OAI verbs and other commands directly on that. A few examples:
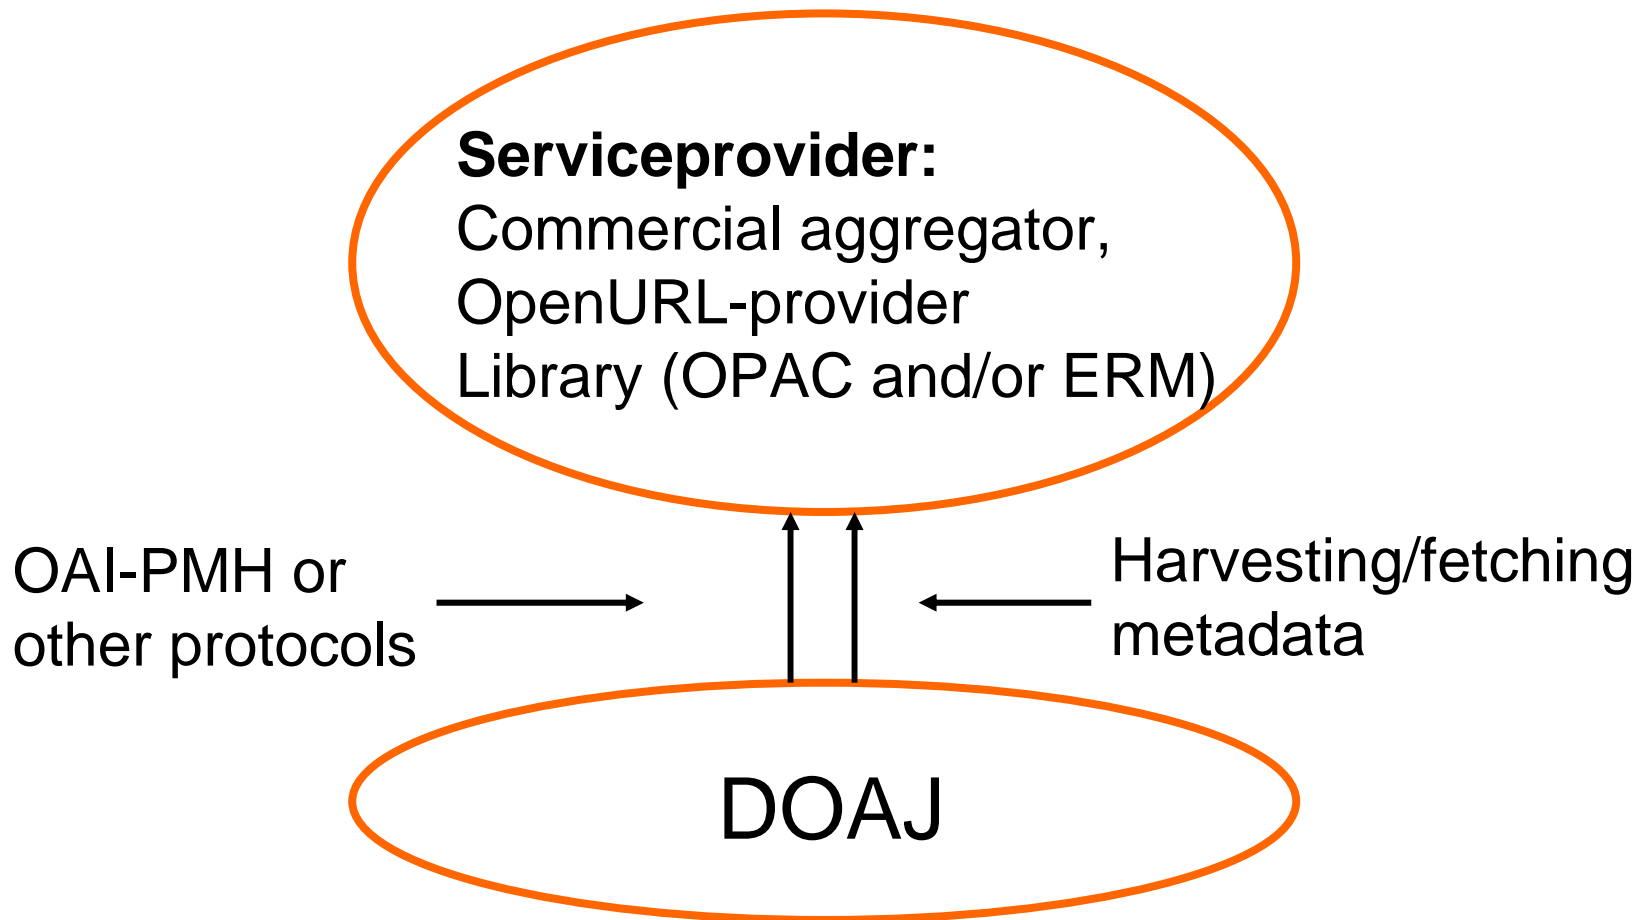

Verb: Identify
http://www.doaj.org/oai?verb=Identify

Verb: ListMetadataFormats
http://www.doaj.org/oai?verb=ListMetadataFormats

Verb: ListRecords&from=2004-01-01&metadataPrefix=oai_dc
http://www.doaj.org/oai?verb=ListRecords&from=2004-03-01&metadataPrefix=oai_dc

From these URLs you'll get both an idea of what OAI is, and much of our metadata. See also our example.

You have also the possibility to download the list of records in DOAJ in a comma separated format. Then you can import the file to Excel or some other software to use the records further. Do as follows:

- Download the file from http://www.doaj.org/doaj?func=csv to your own computer
- Open e.g. Excel
- Go to the menu Data -> Get External Data -> Import Text File
- From there you can choose how you want the spread sheet to look like e.g., delimited-> Comma -> General

How do I get article level metadata from DOAJ?

The article level metadata can be harvested using OAI protocol.
The base URL is: http://www.doaj.org/oai.article
Use OAI verbs and other command options directly on that.
Example:
Verb: ListRecords&from=2004-07-01&metadataPrefix=oai_dc
http://www.doaj.org/oai.article?verb=ListRecords&from=2004-07-15&metadataPrefix=oai_dc

Do you have any restrictions for the use of your metadata?

organizations, circulation audit bureaus, and other reference
sources.

EXCITING NEW FEATURE

Open Access Journals

OPEN ACCESS IN ULRICH'S! In response to the evolving opportunities in serials information, ulrichsweb.com is now
showcasing Open Access (OA) journals -- free electronic full-text academic and scholarly journals from SPARC, PLoS,
Biomed Central, the Directory of Open Access Journals, and other providers. Ulrichsweb.com subscribers can now search
for and directly access the home pages and full-text of hundreds of these exciting new research resources. An "Open
Access" search limiter on the Advanced Search screen lets users pinpoint Open Access titles. In addition, a new "Free"
price limit lets users identify all of the free publications in Ulrich's -- whether print or electronic -- including journals,
magazines, newspapers, newsletters and other serials.

Magazines for Libraries

Do you need to define core journals for your academic or research institution? Are you looking

DIRECTORY OF OPEN ACCESS JOURNALS

So far …

- Global visibility and dissemination of records
  - Integrated in OPAC´s in many, many libraries
  - Several service providers are linking to DOAJ
  - Integrated in the services of aggregators (Serial Solutions, Ullrichs, Ebsco, OVID etc.)
  - And OpenURL-providers (Exlibris etc.)
- Frequently referred to as the most important listing

DOAJ DIRECTORY OF **OPEN ACCESS** JOURNALS

New functionality and developments in the pipeline!

- Service for authors: "where can I publish in OA and what are the conditions??"
- Integration of OA-articles from hybrid journals
- Working with journals to enable them in providing OAI-compliant article level metadata
- Secure long term funding:
  - Donations programme is launched

New service for authors

- Where can I publish in Open Access?
  - Gold (Open Access or Hybrid Journals)
    - Publication charges?
  - Green (Selfarchiving)
    - What (pre-/postprints)
  - Cost-Effectiveness
    - Price per article/citation etc.
  - Impact factor(?)
- Advice in Intellectual Property Rights Issues
- Integrated in Directory of Open Access Journals (DOAJ)

DOAJ

DIRECTORY OF OPEN ACCESS JOURNALS

Welcome to the Directory of Open Access Journals. This service covers free, full text, quality controlled scientific and scholarly journals. We aim to cover all subjects and languages. There are now 2358 journals in the directory. Currently 683 journals are searchable at article level. As of today 107441 articles are included in the DOAJ service.

Authors FAQ

Publishing in Open Access scholarly journals: what are the options?

Q. What is an Open Access journal?
A. An OA-journal uses a funding model that does not charge subscription fees for access. The content is freely available to all.

Q. Why should I publish in an OA journal?
A. Making publications freely available electronically increases their use and the number of times they are cited. By making your publication freely available your impact will grow. See "The effect of open access and downloads ('hits') on citation impact: a bibliography of studies" for more information on this.
http://opcit.eprints.org/oacitation-biblio.html

Q. What about the quality of OA journals?
A. Scholarly OA journals use the same quality criteria as traditional subscription journals, i.e. external or internal peer-review.

Q. Where do I find OA journals?
A. In the Directory of Open Access Journals. The Directory aims to be comprehensive and cover all open access scientific and scholarly journals that use a quality control system to guarantee the content. A journal is included in the DOAJ only if submitted papers are quality controlled through an editor, editorial board and/or a peer-review system.

Q. What is the author pays model?
A. The publishing cost is paid by the author- when his/her article is accepted by a journal. The article is free to all readers. The "author-pays" model has nothing to do with the fees charged by traditional subscription journals for colour prints and/or tables.

Q. What is a hybrid journal?
A. A journal based on traditional subscription revenues with the author pays model as

LUND UNIVERSITY

OSI

AXIELL

SPARC

BIBSAM

SPARC Europe

We would like to thank all who send us journal suggestions we appreciate the contribution to make DOAJ as complete and updated as possible.

We look forward to further collaboration with other libraries, organisations and people who wants to contribute to the further work in making open access journals more visible.

DOAJ - Directory of Open Access Journals, 2006, Lund University Libraries, Head Office

No funding from Jan 2007 –
we need your support!!

LUND UNIVERSITY

Part II

Integration of Open Access content in our library services

Promoting Open Access content in our library services

- Now that we have convinced so many researchers to publish in Open Access

&

- Now that many (not for profit) publishers are considering Open Access publishing

Then

- We have to do whatever we can to expose the Open Access content to the eyes of our users!!

How do we do that??

OA-content from subject or institutional repositories

- Examples:
  - OAIster – http://oaister.umdl.umich.edu/o/oaister/
  - BASE – Bielefeld Academic Search Engine - http://www.base-search.net/
  - SHERPA Search - http://www.sherpa.ac.uk/repositories/sherpasearch.html

OA-content from OA-journals

- **Subscription agents:**
  - Some subscription agents like Swets, Ebsco etc. offer inclusion of Open Access Journals in their services
  - If not – ask for it!!
- **ERM-providers:**
  - Electronic Resource Management providers should as well offer inclusion of Open Access Journals in their services
  - If not – ask for it!!
- **OpenURL-providers**
  - OpenURL-providers (like Exlibris, Endeavour, Innovative Interfaces etc) offer inclusion of Open Access journals in their knowledge bases
  - If not – ask for it!!
- **Library Consortia & Cooperatives:**
  - Library Consortia & Cooperatives could share the work and facilitate inclusion of Open Access journal records in their OPACs and other services.

Going one step further

- It is good that Open Access Journals are visible on title level in A-Z title lists, in the OPAC etc., but…

- What we really would like to see is that OA-content from OA-journals and from OA-repositories is exposed to our users completely integrated with the content from commercial and not-for-profit toll access publishers.

- This is what we try to accomplish in Lund!

Adressing the problems

- The problems:
  - Numerous databases and journal providers – numerous interfaces
  - Several thousand e-journals difficult to find
  - Portals provided by subscription agents and journals publishers are not invented primarily to accomodate end user needs but more to generate their business.

Finding information

- **Library branding is very important**
  - users often believe that full-text e-journals are free on the Internet!
  - "If it is not on the web, it does not exist"
- We want to brand our services and promote Open Access resources

Our answer to the demand for integration of OA-content in modern library services

ELIN@ - an interface to hybrid library resources developed by a library for libraries

Organising end user access

- The goals:
  - Integration of all services
  - Development of personalized services
  - Branding of library services
- Principles:
  - Single sign on – automatic authentification – one login/password to all resources
  - Remote access

Lund University Libraries

ELIN: Electronic Library Information Navigator integrates data from several publishers, databases and e-print open archives.

2006-08-29: 3.7 million records from Elsevier (volumes older than 1995) have been added to ELIN@Lund and are now searchable in Articles.

ELIN service allows you to search documents from multiple sources using one single user-friendly interface.

In ELIN:

- You can get an overview of all online resources recommend by the libraries.
- You can cross search among different type of documents from different providers using one single user-friendly interface
- You can request all articles available in full text
- You can browse table-of-contents
- You can download bibliographic data in other formats, e.g. for EndNote or Reference Manager
- An alert system automatically notifies you about new documents matching your saved query
- An alert system automatically notifies you about new issues of your favorite journals

Title
Integrated Application of Metadata and OAI-PMH to Digital News Archive

Authors
Sinn-Cheng Lin; Pei-Shiun Kang

Abstract
This paper studies the metadata integration problem between the Taiwan Baseball News Database and the Union Catalog of National Digita
Archives Program. First, we design a metadata transformation system which can transform the news articles to four popular metadata forn
DC, NITF, RSS and DAC. The system not only supports metadata transformation but also RSS subscription and batch exportation for Union
Catalog. Secondly, based on the OAI-PMH architecture, the digital news archives plays a role as Repository, and then we extend the syste
be a Data Provider. It can be queried by any Service Provider, parse the Verbs, and then respond the Record Sets to the Service Provider
certain metadata format. As a result, the digital news can be delivered more efficient.

Key words
Digital archive; Metadata; Makeup language; Union catalog; OAI-PMH

ELIN@ - systems architecture

Integration of Library Services – Towards the one stop shop

- OPAC –printed collections
- Databases, encyclopedias, reference works etc.
- Electronic journals
- Open access resources
    - Open Access Journals
    - E- & preprint archives, institutional repositories
    - Subject gateways

Personalization

- "My Library"
  - Recommended resources – selected by subject librarians
  - Add your personal favourites
- SDI-alerts from databases, journals etc.
- TOC-alerts
- Users register at one site for all alerts

ELIN@ - Electronic Library Information Navigator

- Advantages for end users:
  - One interface for all content
  - Cross search documents from multiple sources – open access or licensed
  - Document delivery services for documents not available in Full Text
  - ToC alerts and SDI´s
  - Integration with reference management tools

ELIN@ - Electronic Library Information Navigator

➢ Advantages for librarians:

  ➢ Enhancing availability and visibility of scientific literature

  ➢ Increasing e-journal cost efficiency – Usage is boosting

  ➢ Administrative functions/Management tools:

   • Customization, Statistics, Collection Management, Budgeting, Marketing

   • Subscription administration functionalities

ELIN@ - Electronic Library Information Navigator

- **Contents (Oct 2006)**
  - +15.600 journals, whereof
  - +14.400 journals with metadata (cross searchable on article level)
  - +34,000,000 article level records
  - Databases
  - E-print archives

ELIN@ -partners

- 9 universities & university colleges in Sweden
- Nordic Asian Institutes
- Aarhus Business School, Denmark
- University of Gent, Belgium
- Makarere University, Uganda
- National University of Rwanda
- Vietnam: Legal departments
- 10 universities in Pakistan – 90 more in the pipeline
- In the pipeline:
    - African Virtual University
    - Cuba
    - Ghana

Electronic Library Information Navigator (ELIN@)

The development of the ELIN@PERI application and pilot implementation is being undertaken during 2004-2006. Initially the project will involve software development and modification by Lund University Library, then training and pilot implementation in small number of selected PERI partners, followed by a review and evaluation period. Once these three stages have been completed, a decision will be made on extending the project and releasing the application under an open source license.

- **News and latest developments**
- ELIN@ pilot review
- Background to the development of ELIN@
- Benefits of ELIN@
- ELIN@PERI developments
- What ELIN@ means for the end user and their institution
- Pilot system objectives
- Technical overview
- What an ELIN@PERI screen might look like
- Virtual tour of ELIN@Lund [This is included as an MS Word document that is 988Kb in size (compressed using WinZip) may take some time to download over a slow connection.]

For more information contact Martin Belcher at INASP (mbelcher@inasp.info). Section last updated: **11 October 2006**

Thank you for your attention!
