OpenAIRE Guidelines

for data sources

2/5

A green circular graphic containing the text "2/5", representing the second step in a five-step process.

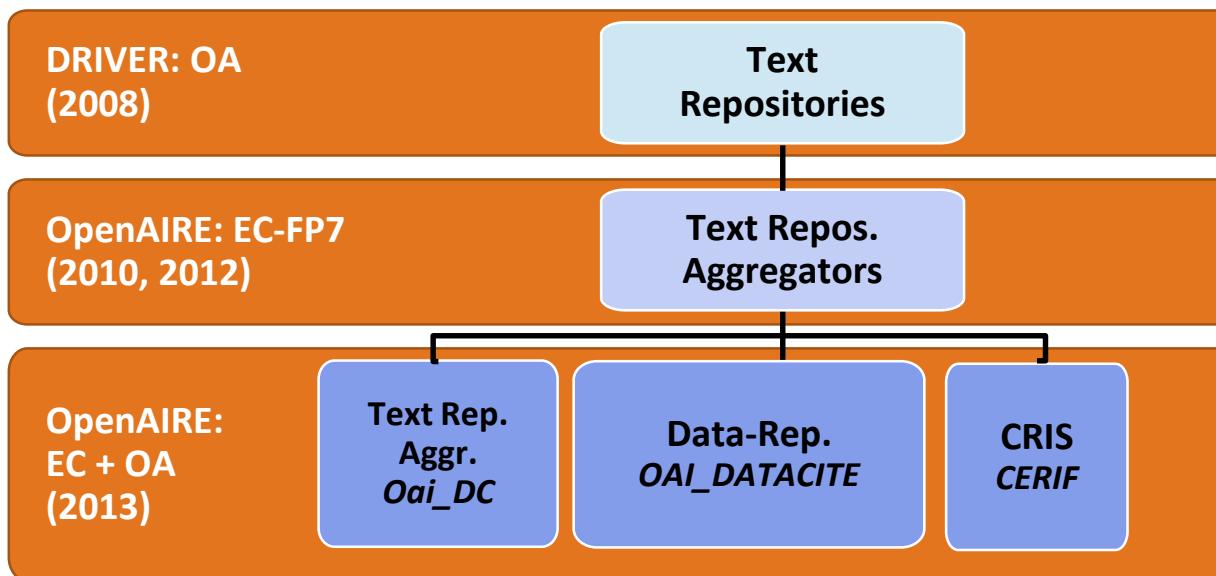

Where we started...

- **'oai_dc' 15 elements based on DCMES schema**
 - As established and 'lowest common denominator' OAI format
- **Used in numerous interpretations -> interoperability issue**
- **Requires agreements on syntax (use of OAI-PMH & oai_dc) and semantics (controlled vocabularies)**
 - DRIVER Guidelines v2 introduced in 2008
 - info:eu-repo Application Profile for encoding schemes
- **Mainly used to describe textual resources**
 - Continued in OpenAIRE Guidelines since 2009

In the meantime...

- OpenAIRE scope & requirements have expanded since then
 - By complementary types of data sources
 - For research data and research information
 - Non-textual content
 - Publication and data linking
 - Project contextualization
- New global “authoritative” identifier based infrastructures
 - For authors/contributors
 - funders / projects
 - research outputs

How do they work?

- Identification of Open Access and funded research results by OAI-Sets:
 - ‘ec-fundedresources’
 - ‘openaire’
 - ‘openaire_data’
- Latest schema guarantees backwards-compatibility with previous versions.
- Enhancing research results by metadata enrichment in OpenAIRE.

OpenAIRE

“Repository managers will be able to enable authors to fulfill the EC Commission Open Access requirements”

The screenshot shows the OpenAIRE homepage. At the top, there's a navigation bar with links for 'PARTICIPATE', 'SEARCH', 'STATISTICS', 'SUPPORT', and 'OPEN ACCESS'. Below the navigation is a large banner with the text 'Science. Set free.' and a count of '8399.456 publications and 611 datasets from 435 repositories and OA journals'. The main content area features sections for 'Researchers', 'Data Providers', 'Research Managers', and 'Funding Agencies', each with a brief description and a list of links. There are also sections for 'Latest News' (with a link to a 'Workshop on Mining Scientific Publications') and 'Mark your calendar' (listing events like the '3rd LIBER Workshop on Digital Curation' and 'ESGI Community Forum 2014'). A sidebar on the right is titled 'Digital Repository of Ireland: Open Access and a User-Centred Approach' and features the 'dri' logo.

LA Referencia aligned with OpenAIRE Guidelines

- Latin America Open Access Repositories Network
- Central metadata elements and use of vocabularies
 - Access rights: openAccess; embargoedAccess
 - Use of Creative Commons licenses recommended
- Consider regional aspects compared to OpenAIRE regarding
 - Mandatory , mandatory if applicable and recommended use of metadata fields
- Collaboration between LA Referencia and OpenAIRE ensures future compatibility of the guidelines

OpenAIRE Guidelines, RIOXX and the case in UK

- RIOXX to support UK repositories for compliancy with funder OA policies (RCUK, HEFCE)
- Introduction of element / attributes to encode project / funder information
- Based on oai_dc + rioxx terms and rioxx attributes
- Supports NISO-ALI
- Support of EC-H2020 OA mandate is (currently) done via agreed mapping between RIOXX and OpenAIRE Literature Guidelines

Innovative Scholarly Services – Need of Improved Metadata Quality

- **Features**
 - Disambiguation by identifiers for authors / contributors, funders / project grants, research outputs
 - Explicit links to landing pages and fulltext files
 - Explicit links between publications and other research outputs
 - Detailed bibliographic citation information
 - Explicit and machine readable license information
- **Future proof**
 - Compatible with linked data principles
 - Extensibility towards Open Science properties
- **Backward compatibility and low-barrier upgrade**
 - Following DCMI Guide on Publishing Metadata (dcterms)
 - COAR IG Controlled Vocabularies

Innovative Scholarly Services – Need of Network Alignment

- Alignment & collaboration needed between major repository initiatives
 - LA Referencia, SHARE, RIOXX, OpenAIRE, ...
 - COAR-CASRAI OA Interoperability WG
 - Alignment on metadata elements and vocabularies
 - COAR IG Controlled Vocabularies
 - Community driven effort to supersede info:eu-repo application profile
 - Working on an up to date technological standard
 - Editorial Board to ensure expertise and long-term support

OpenAIRE compatibility for different DSpace versions

Dspace 1.8.2

Via OAextended add-on and also via XOAI add-on

DSpace 5

OAI 2.0 is a standard part of DSpace 5.0

- OpenAIRE 2.0 compatibility via XOAI and will be partially compatible with OpenAIRE 3.0 guidelines via patch (to be presented) .

OAI 2.0

OAI 2.0 is a standard part of DSpace 3.0, 4.0 and 5.0

What is OAI 2.0?

OAI 2.0 is a Java implementation of an OAI-PMH data provider interface that uses XOAI, an OAI-PMH Java Library.

Why OAI 2.0?

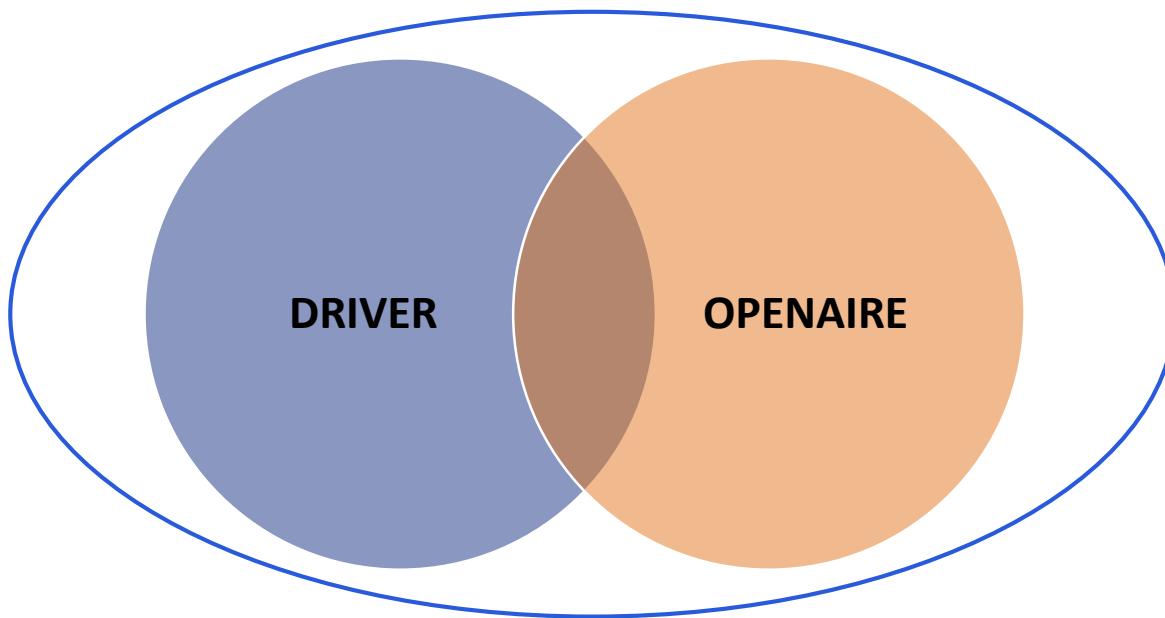

Projects like OpenAIRE, DRIVER have specific metadata requirements.

As the OAI-PMH protocol doesn't establish any frame to these specifics, OAI 2.0 can have more than one instance of an OAI interface (feature provided by the XOAI core library) so one could define an interface for each project.

Concepts: Filter, Transformer and Context

- With a Filter is possible to select information from the data source.
- A Transformer allows to make some changes in the metadata before showing it in the OAI interface
- OAI 2.0 also adds a new concept to the OAI-PMH basic specification, the concept of context.
