### Abstract

*Every library is in a different place in completing their goal of becoming a "digital library." Some libraries have a wealth of commercial e-content that could be more utilized, other libraries aim to integrate archival material and electronic research findings into their virtual collections, while still more libraries have the goal of integrating both commercial and local digital content. No matter where your library is on the digital library continuum, Endeavor Information Systems has a system to fit your library's growing needs.*

*Keyword: federated searching, OpenURL linking, linkresolver, entitlement management, digital collections, archiving, e-journals, digital library framework, resource access, publisher, Elsevier Science, ScienceDirect.*
