- VuFind, University of Villanova
- Blacklight, University of Virginia, Stanford, Johns Hopkins
- eXtensible Catalog project, University of Rochester
VuFind is a library resource portal designed and developed for libraries by libraries. The goal of VuFind is to enable your users to search and browse through all of your library’s resources by replacing the traditional OPAC to include:

- Catalog Records
- Locally Cached Journals
- Digital Library Items
- Institutional Repository
- Institutional Bibliography
- Other Library Collections and Resources

VuFind is completely modular so you can implement just the basic system, or all of the components. And since it’s open source, you can modify the modules to best fit your need or you can add new modules to extend your resource offerings.
Looking for Articles?
- Browse or search the complete list of databases
- Not sure which database to try? Try these selected databases
- Go to xSearch (search several databases at one time)

Connecting
- Connecting to databases from off-campus
- Report a connection problem

Course Reserves
Search the Course Reserves Catalog for print, media and e-resources set aside for classes.

Can't find it at Stanford?
Request it through interlibrary borrowing, or ask us to purchase it for the libraries.
What's Included?

Virgo contains both the catalog—with materials like books, print journals, DVDs, maps, and digitized materials—and online articles from our rich array of subscription journals. The sub-collections at right have custom searches for media- and discipline-specific materials.

Getting Started

Type some keywords, an author's name, or even a full title in the search box above, optionally limit your search to just the catalog or online articles, then click "Search." Once you've settled on either a catalog or article search, you can filter results by author, publication period, and more. Need to craft a complex search? Choose an advanced search option to the right of the search box.

Next Steps
Νέα υπηρεσία ταυτόχρονης αναζήτησης στο σύνολο των ηλεκτρονικών πηγών του Α.Π.Θ.

Χρησιμοποιήστε τη για να εντοπίσετε βιβλία και περιοδικά, πλήρες κείμενα, άρθρων περιοδικών, βιβλιογραφικές αναφορές κ.α.
Web Scale Discovery Services

- WorldCat, OCLC
- Summon, ProQuest SerialsSolutions
- Primo Central Index, Ex Libris
- Discovery Service, EBSCO
Χαρακτηριστικά Web Scale μηχανών αναζήτησης

- Ένα ευρετήριο/βάση δεδομένων
- Αναζήτηση στο έντυπο & ηλεκτρονικό υλικό της βιβλιοθήκης
- Περιορισμός των αποτελεσμάτων με πολλούς τρόπους
- Χρήση αλγορίθμων για επίτευξη σχετικότητας στα αποτελέσματα
- Ταχύτητα στην ανάκτηση των αποτελεσμάτων
- Ευκολία στη χρήση
The Summon™ Service

True Web-Scale Discovery: Full-Breadth of Library Content - Easy & Fast.

Your library, with a single starting point.

The Summon™ web-scale discovery service enables a familiar web-searching experience of the full breadth of content found in library collections—from books and videos to e-resources such as articles. It goes beyond federated search, beyond next-generation catalogs to create an all-new service for libraries.

Through one simple search to a single unified index, the Summon service provides instant access to the breadth of authoritative content that’s the hallmark of great libraries. No need to broadcast searches to other databases—it provides one search box for a researcher to enter any terms they want and quickly get credible results in one relevancy ranked-list.

Librarians like the service’s power to transform their institution’s search experience, and have found it easy to set up and integrate into their current library operations.

Content types include: library catalog records, e-journal articles, databases, newspaper articles, e-books, dissertations, institutional repositories, conference proceedings, grey literature, cited references, reports, digital library, more.
Χαρακτηριστικά Summon

- **CONTENT**: map and normalize metadata
- **INDEX**: single unified search index including full text
- **RIGHTS**: search appropriate resources
- **RESULTS**: relevance ranked quick reliable
- **API**: integrates with other systems
- **INTERFACE**: clean simple easy to use
