The evolving setting towards Open Access in Spain

MedOANet Final Conference
Athens, October 2013

Clara Eugenia García

Deputy Director of Planning and Monitoring
State Secretariat for Research and Innovation
Ministry of Economic Affairs and Competitiveness

1. General overview
2. Institutional framework: policies and mandates
3. Building OA infrastructures and service provision
4. Next steps

General overview

FECYT

Spanish partner promoting OA

FECYT is the national helpdesk supporting the project implementation in Spain.

2009: RECOLECTA. A nationwide infrastructure of OA scientific repositories and the reference in the promotion and evolution of OA in Spain. It gathers all the national scientific repositories.

2010: OpenAIRE. It provides the resources to promote and realize the widespread adoption of OA policies in the EU.

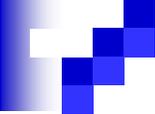

2011: OpenAIREplus. For the incorporation of research data sets linked to scientific papers from FP7. In the short term, OpenAIREplus will issue a series of basic directives for datasets.

2011: MedOANet. It addresses the necessity for coordinated strategies and policies in OA in Europe. It enhances existing policies, strategies and structures and contributes towards the implementation of new ones in six Mediterranean countries.

Institutional framework

2009. Regional OA initiatives: Madrid and Asturias

2011. National OA Mandate: Science, Technology and Innovation Act.

Other Open Access policies and mandates: HEIS, PROs, and scientific institutions.

Institutional framework: Regional OA policies

Madrid Regional Government:

2005. e-ciencia: harvester for the 7 public universities' repositories based on the region.

2009. First Call -R&D projects- including an open self-archiving mandate in the fields of technological/engineering and biomedicine.

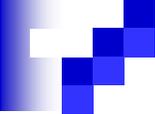

The outcomes of the initiative are being assessed. In the near future it will extent the self-archiving mandate to other calls.

Asturias Regional Government:

2009. RIA: regional repository.

2009: Regional R&D funding includes Open Access self-archiving.

Institutional framework: National OA Mandate

Act 14/2011 for Science, Technology and Innovation

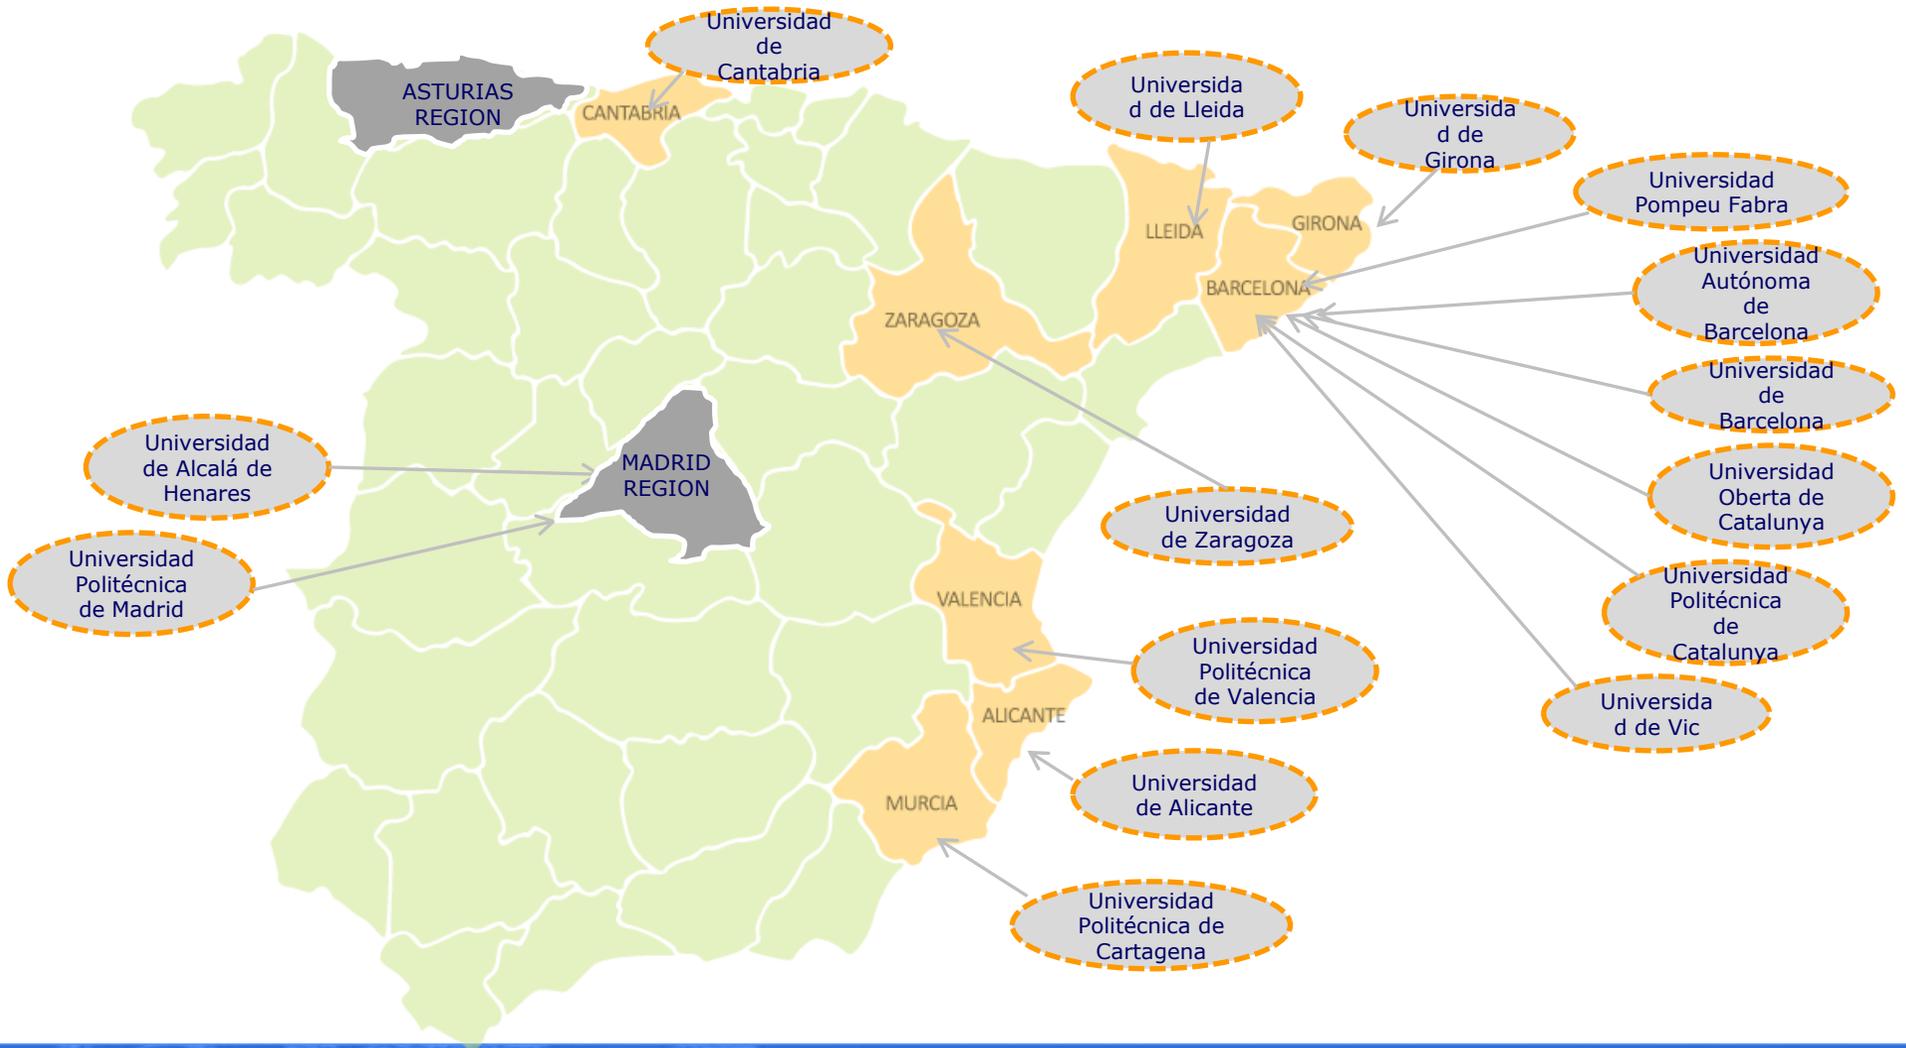

It compels Spanish researchers to archive in an OA repository all the scientific publications resulting from publicly funded activities (State/National RDI Plan).

Article 37 “Open Access Dissemination”

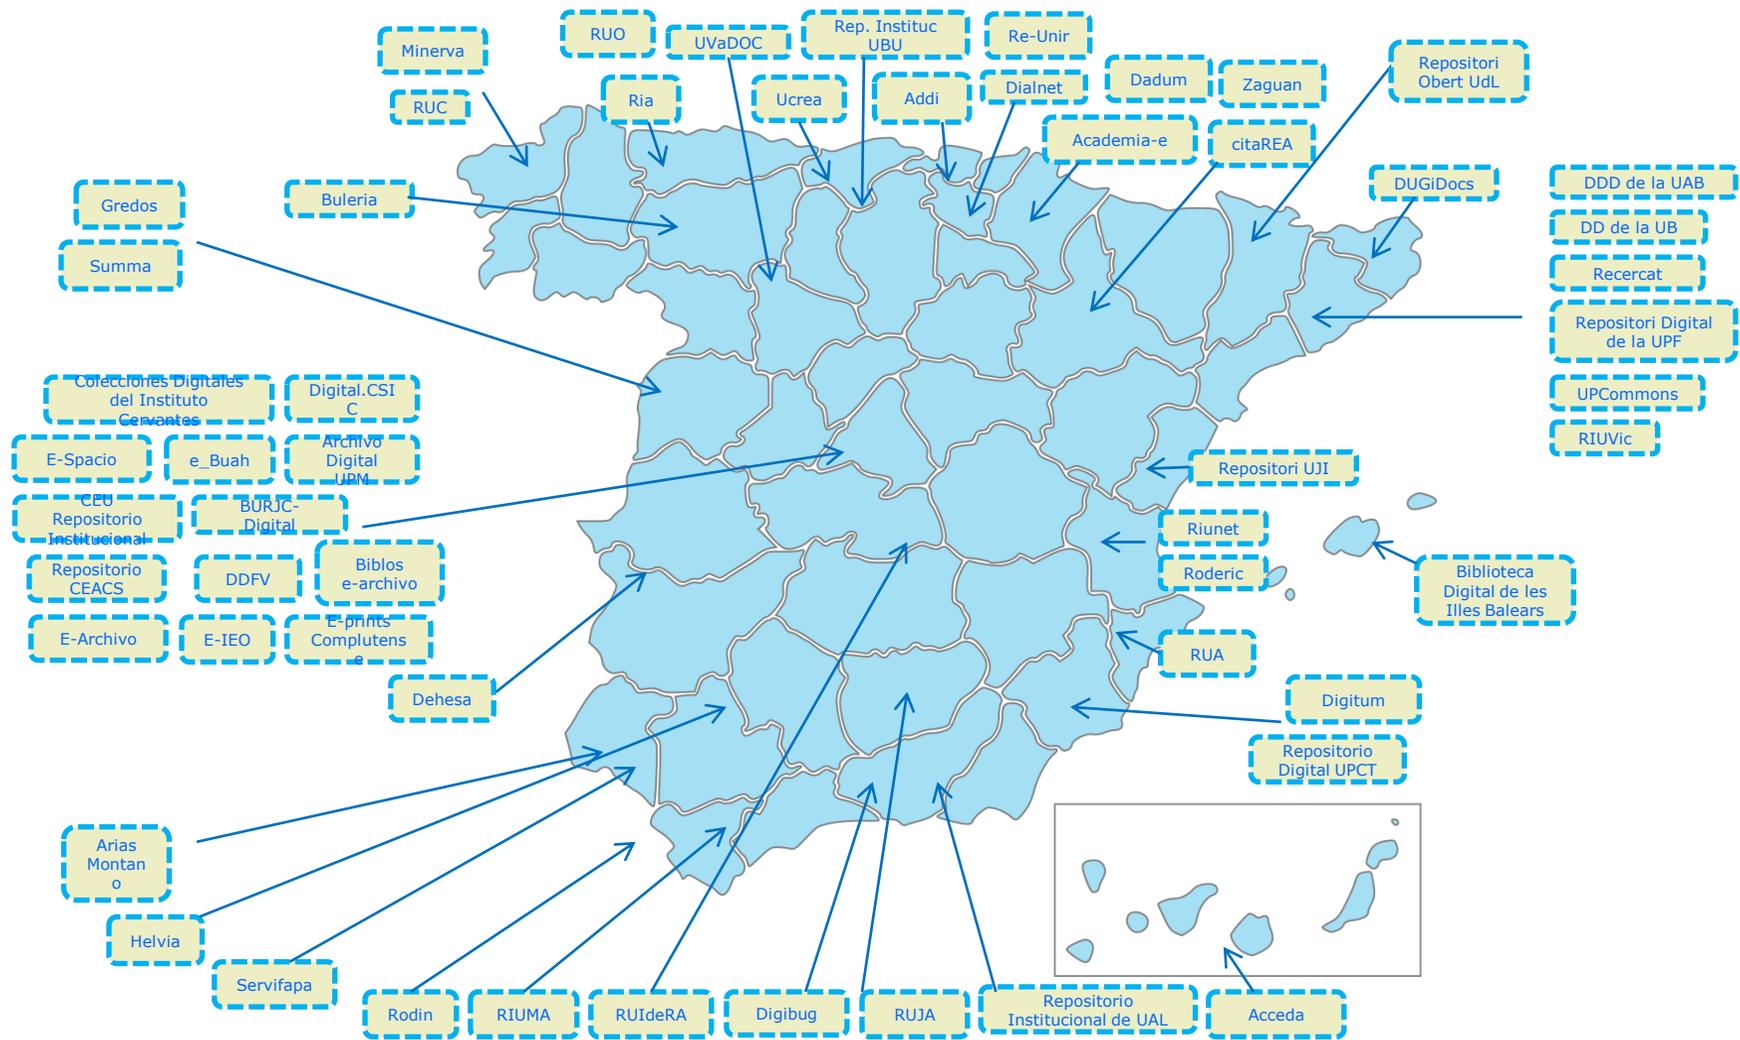

- Researchers will issue a digital version of the final version of the contents which have been accepted for publication in research journals or periodicals not later than twelve months after the official date of publication.
- The electronic version will be published in OA thematic or institutional repositories.
- Public electronic version may be used by public administrations in their evaluation processes.
- The Government will provide centralized access to repositories, and its connection with similar national and international initiatives.
- Third parties contractual agreements and IPRs protection.

Institutional framework: HEIs and PROs

Building OA infrastructures

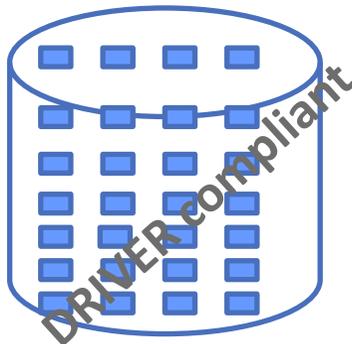

Building OA infrastructures

Open Access Institutional Repositories: 80% of Universities have their own institutional repository, creating strong need of centralized coordination, quality standards and settings.

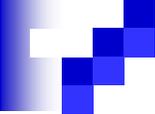

RECOLECTA. National harvester & service provider.

Recolecta
RECOLECTOR DE CIENCIA ABIERTA

- 56 institutional repositories
- 5 thematic repositories
- 4 journal portals
- 18 journals

Building OA infrastructures

RECOLECTA is a combined effort that joins together the Association of Spanish Universities (CRUE) and the Spanish Foundation for Science and Technology (FECYT)

REBIUN contributes with encouraging and promoting all universities to:

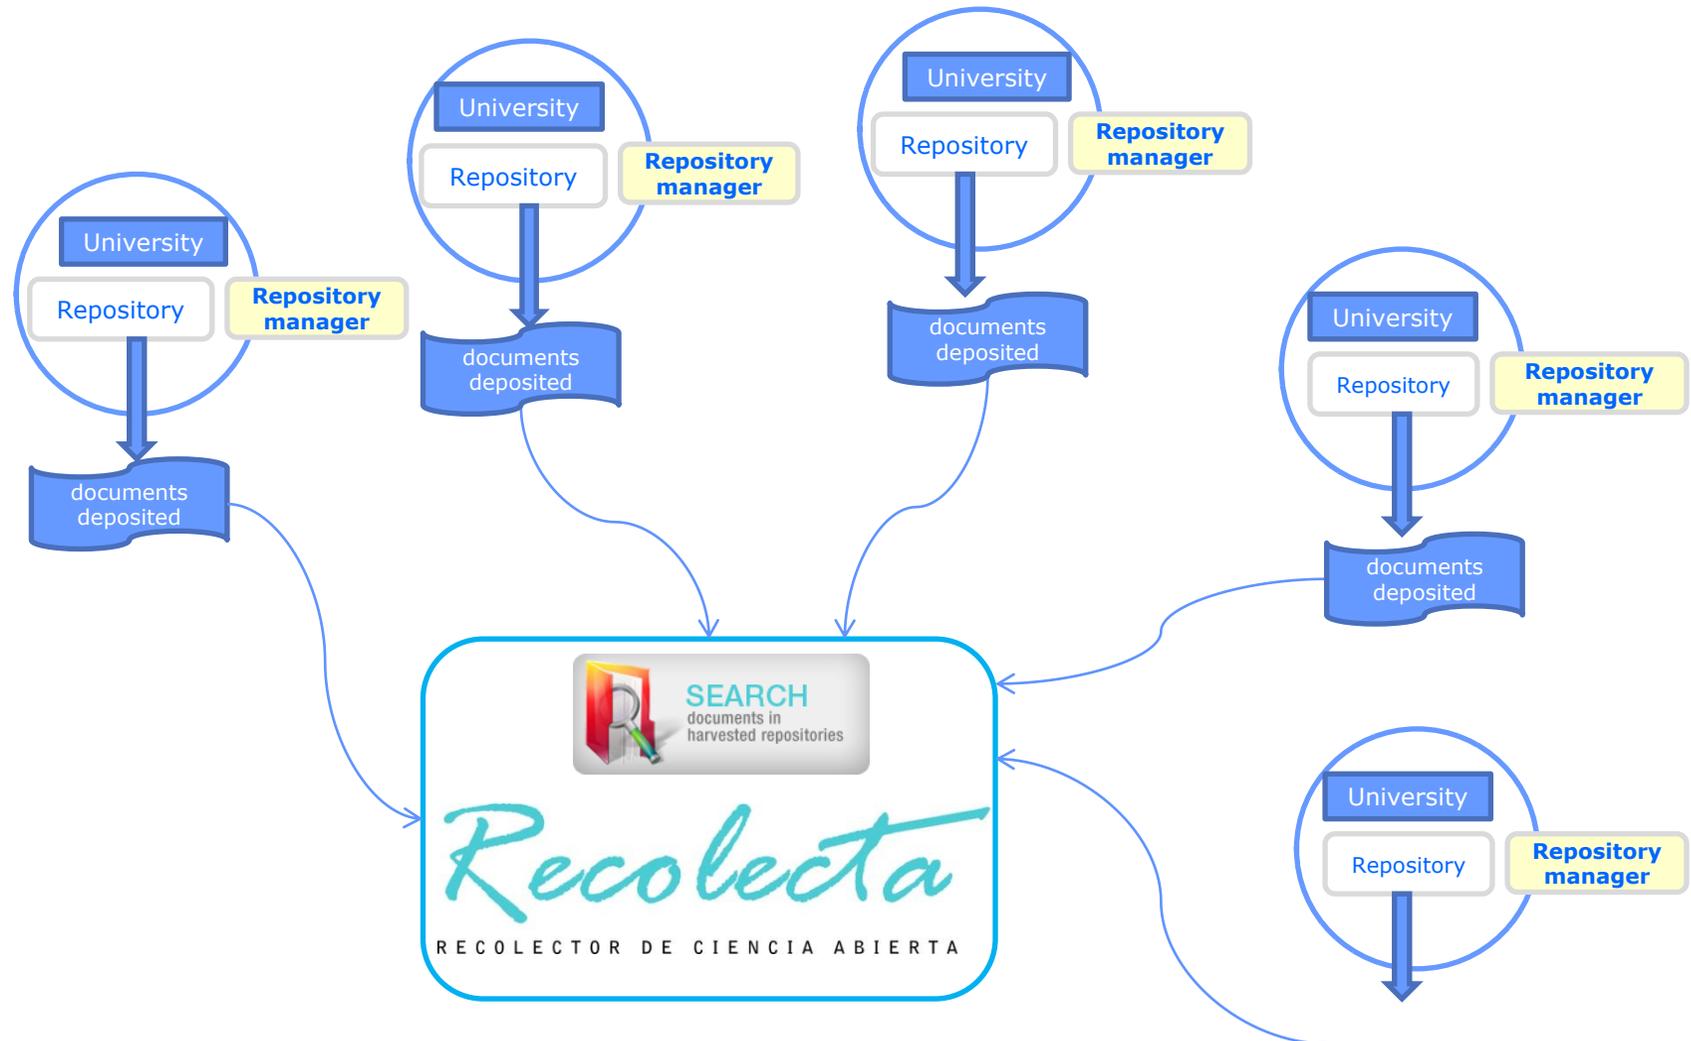

- ✓ Create their own institutional repository
- ✓ Join RECOLECTA and comply with its technical requirements

FECYT contributes with:

- ✓ The harvester (based on D-NET)
- ✓ A continuous evaluation of repositories' technical robustness
- ✓ An statistics module to measure the repository activity
- ✓ Communication and dissemination services to the repositories community

Building OA infrastructures

Building OA infrastructures

Recolecta

RECOLECTOR DE CIENCIA ABIERTA

Nationwide OA infrastructure of scientific repositories.
Platform that gathers all the national scientific repositories.
National reference.

The **aims**....

- To promote and coordinate the national infrastructure of OA digital scientific repositories in an interoperable manner based on global standards
- To foster and facilitate the adoption of OA policies

Stakeholders ...

- Repository managers
- Researchers
- Decision makers

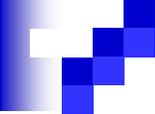

... RECOLECTA facilitates

- Open and free access to Spanish scientific production
- Support services for users and strengths the national OA community
- Promotes activities to spread information and fosters collaboration

Next steps

OA Policies WG: the experts involved (members for universities with OA policies) assist in the definition of guidelines for the implementation of OA policies (authors, repository managers, funders, research organizations...).

Statistics WG: development of a standardized system for data collection and access to scientific OA articles. The service will provide aggregated repositories statistics.

Repositories Evaluation WG: the members involved will ensure the interoperability of repositories along with the DRIVER evaluation carried out by FECYT. The first expected outcome is a new updated version of the "*Guide for the evaluation of institutional research repositories*" published in 2010.

Main Challenges

Full institutional coverage of appropriated OA infrastructures

- New institutional repositories
- **Creating an orphan repository**

High quality standards -institutional repositories-

- DRIVER
- Metadata
- Archiving policies coordination

Measuring impact of OA policies

Implementation of the OA mandate in forthcoming national calls

Assessing and **monitoring** how the OA mandate is carried out by R&D institutions and researchers
