

50. Miller

III

For the purpose of the present paper, it is
 desired to state that the present paper is
 intended to be a preliminary report on the
 results of the work done during the past
 year. It is hoped that it will be of some
 interest to the members of the Society.
 The work has been done in the
 laboratory of the University of
 Cambridge, and the results are
 given in the following tables.
 The first table shows the results of
 the experiments on the effect of
 temperature on the rate of
 reaction. The second table shows
 the results of the experiments on
 the effect of concentration on
 the rate of reaction. The third
 table shows the results of the
 experiments on the effect of
 catalyst on the rate of reaction.
 The results of the experiments are
 given in the following tables.
 The first table shows the results of
 the experiments on the effect of
 temperature on the rate of
 reaction. The second table shows
 the results of the experiments on
 the effect of concentration on
 the rate of reaction. The third
 table shows the results of the
 experiments on the effect of
 catalyst on the rate of reaction.
 The results of the experiments are
 given in the following tables.
